

Dextra Sustainability Report

December 2025

As an environmental consulting firm, our company and employees are rooted in making the world a better place to live. Protection of human health and the environment are at the heart of everything we do. To that end, our business model incorporates a goal to be as close to carbon neutral as possible, and we are proud to report that we have no Scope 1 or Scope 2 emissions, as defined in GHG Protocols.

Company Profile

- Dextra is an environmental consulting firm specializing in outsourced project management for remediation projects and programs.
- Dextra is incorporated in Georgia and a small company of only three employees. Each employee works remotely out of an office in their home.
- Dextra owns, leases, or operates no facilities. Dextra also owns no vehicles or equipment outside of standard office equipment, such as personal computers and monitors.
- Dextra employees are occasionally required to travel to project sites (owned by Dextra clients or third parties) for meetings.

Greenhouse Gas (GHG) Emissions Profile

- As it does not own or operate any facilities or vehicles, Dextra has no Scope 1 emissions.
- Dextra also has no Scope 2 emissions. Dextra only purchases and uses electricity in conjunction with working from our home offices, which is a Scope 3 emission per GHG Protocol.
- Dextra's Scope 3 emissions are limited to the following:
 - Use of electricity for home offices.
 - Business travel as dictated by project needs and as requested by Dextra's clients.
 - Purchase of office supplies and IT equipment such as computers.

GHG Commitment

- Dextra commits to maintaining no Scope 1 or Scope 2 emissions for the next five years (2026 through 2031).
- Dextra commits to further evaluating its Scope 3 emissions and whether opportunities exist to reduce those emissions.
